

Teepol BOC

BIOLOGICAL ODOUR CONTROLLER

About

Teepol BOC is a biological odour digester that will effectively remove organic odours from all types of surfaces and fabrics.

Features & benefits

BOC will remove 99% of old or new odours including:

urine / fecal matter / vomit / blood / body and animal smells

Works effectively on:

store bins / waste bins / wheelie bins / carpets / fabrics / trainers & work boots

Ideal for removing urine odours from toilets and washrooms. These types of odours are notorious hard to eliminate and conventional products often only mask the smell, allowing it to return later - Teepol BOC will eradicate them for good.

How to use

Spray directly onto source of the odour. Once activated the solution gets to work below the surface and penetrates to the source of the offending odour and progressively removes it. Because of the way the product is designed, it needs a little time to work effectively. Clean up any solid matter or staining first with Teepol BGS.

TEST FOR COLOUR FASTNESS BEFORE USE

Useful information

Product characteristics

Blue liquid with citrus odour.
pH. 5.5 – 6.5

Availability

Stock product.

Composition

See Safety Data Sheet.

Storage

Store at temperatures above 5°C and below 30°C. Shelf life: Normal storage conditions – minimum 1 year.

Pack sizes

6 x 750ml
