

How to clean your **Bathroom** the Teepol way with our very own Queen of clean Lynsey

Everyone wants to have a clean home for their family and friends. And now you can learn how to clean a bathroom in a few easy steps with me, Lynsey Crombie and the right Teepol Products.

Be Prepared

First you will need cleaning cloths, sponges, a mop, bucket and toilet brush. Along with the following Teepol products: Glass & Window Cleaner, Bathroom Cleaner Spray, Toilet Cleaner, Bactericidal Hard Surface Cleaner, Lemon Floor Cleaner and Descaler. You might also need some Cream Cleaner.

Toilet

- Spray outside of toilet with the Teepol Bathroom Cleaner, wipe clean with a clean soft cloth.
- Squirt toilet bowl with either Teepol Daily Use or Teepol Apple Toilet Cleaner inside the bowl and leave to work before scrubbing with the toilet brush if needed.
- While the toilet cleaner is working inside the bowl, spray around the rest of the toilet including underneath the seat and behind the toilet and the cistern.

Lynsey's Top Tip: *If it is easy to open the cistern lid, add a good squirt of Descaler into cistern as this will keep the limescale at bay and clean right in the pipes!*

- Now flush toilet leaving it sparkly clean and germ free.

Bath and/or Shower

- Spray entirety of shower walls and screen with Teepol Bathroom Cleaner. With its built in descaler this will remove all the white powdery marks and soap scum. Spray into any rubbers, joins and seams

Lynsey's Top Tip: *use an old toothbrush to scrub in the hard-to-get places. Finish off by washing down the whole shower cubical!*

- Do the same all over the bath. Allow the cleaner to sit while it does the work for a few minutes, then wash down with clean water for top cleaning results. Remember you can use that toothbrush to do around the taps.
- Remember to remove any hair from the bath/shower plugs.

Lynsey's Top Tip: use the Teepol Glass & Window to buff the tiles and shower screen to give them a nice shine!

Mirror

- Spray the mirror with Teepol Glass and Window Cleaner.
- In a side-to-side motion starting at the bottom of the mirror, wipe up the glass cleaner and avoid streaking.

Lynsey's Top Tip: use a clean lint free cloth!

Sink

- Spray inside and outside the sink as well as the taps with Teepol Bathroom Cleaner.
- Clean away any stains or deposits of toothpaste or soap around the sink and on the taps again - the toothbrush tip is useful here too! Wipe with clean cloth so the sink and taps gleam.

Lynsey's Top Tip: If you have those grey lines on your sink that look like pencil lines they are usually caused by jewellery, rings etc. These can be removed with a little Teepol Cream Cleaner on a cloth - rub mark and watch it go!

Floor

- On tiled, lino or wooden floors wipe over with a mop using either Teepol Lemon Floor Cleaner or Teepol Bactericidal Hard Surface Cleaner - both are dilutable in hot water.
- Starting with the point furthest from the door, mop in a side-to-side motion.

Lynsey's Top Tip: don't forget to do the door handles as you leave!

You now have a clean, germ free bathroom the Teepol way with my Top Tips!
